

The image shows a large, dense grid of binary digits (0s and 1s) arranged in a triangular pattern. The grid is composed of two main parts: a left section where each row contains a single '1' followed by a series of '0s', and a right section where each row contains a sequence of '1s' followed by a series of '0s'. The rows increase in length from top to bottom. The entire grid is enclosed within a thick black rectangular frame.
